

Can my windshield be repaired?

You might wonder if your windshield can be repaired or not. Go through this checklist and find out right now :)

- The impact area is larger than a Nickel
- The chip is larger than a dime!
- The longest crack is more than 2 inches!
- The chip is older than a year
- The crack is touching a edge
- The Chip closer than 1 inch to the edge

If you checked more than one then it is sure that you need a windshield replacement. If none is checked then you have a 95% chance for a successful repair.
